New York, N. Y. 10016

INDEX TO VOLUME 53

ARTICLES

Aid-Air Testing Project in Liberia, The, Russell N. Cassel, 283.

American Council on Education Rankings of Quality in Graduate Education and Membership in the National Academy of Science, The, B. Richard Siebring, 75.

An Objective Look at Team Teaching in High School Biology, John Schmitt, John Montean and Paul Joslin, 273.

Another Look at the Chimera of Cookbook Chemistry, Nathan Feifer, 111.

Application of Psychological Theory to the Analysis of Structure in Science Teaching, The, O. Roger Anderson, 227.

Balancing Chemical Equations, Noojin Walker, 341.

Band Wind Instrument Mouthpieces May Harbor Countless Disease Viruses and Bacterial Flora, Arthur H. Bryan, 377.

Biology Teaching in Secondary Schools, New Concepts of, Ehud Jungwirth, 277.

Books, Libraries, and Science Fairs, Grace L. Eyster, 171.

Canadian Views British and American Secondary School Science, A, Stanley Norris, 35.

Change in Attitude of American Society Toward Science, Virgil M. Riggs, 115.

Comparable Proficiency in an Applied Electricity Course of Students at a Land Grant University and Its Branch Schools, Richard R. DeBlassie and Louis Klein, 107.

Conceptual Schemes of Science, The, Laurence J. Victor, 335.

Conservation Education Today and Tomorrow, John A. Gustafson, 187.

Contrasting Patterns of Inservice Education, A Study of, Marjorie A. White, Chester E. Raun and David P. Butts, 13.

Creativity: Critique, Thomas Noffsinger, 393.

Critique of Two Studies Dealing with Selected American, Danish, and Greek Families, Panos D. Bardis, 231.

Cross-National Comparison of Biology Majors Preparing to Teach in the Secondary Schools, A, William Wiersma and Thomas Ten Hoeve, 145.

Descriptive Analysis of the Teaching of the Metric System in the Secondary Schools, A, Mary Ollerich Murphy and Maxine A. Polzin, 89.

Design for Pre-Service Science Teacher Education, A, John J. Koran, Jr., 47.

Do Real Differences Exist between Old and New Curricula?, William K. Esler, 67.

Early Theories on the Nature of Heat and Light, Ned D. Heindel and Nancy C. Warner, 127.

Evaluating Instructional Outcomes in Elementary Science, Russell L. Carey, 403.

Evaluation in Unified Science: Measuring the Effectiveness of the Natural Science Course at the University of Chicago High School, Leopold E. Klopfer and Donald C. McCann, 155.

Evolution, and the Conflict between Conventional Wisdoms, R. A. Lyman, 245.

Extraterrestrial Life Detection Techniques in the High School Biology Laboratory, Demonstrations of, Ronald Saltinski, 165.

Fundamental Research in Undergraduate Chemistry Departments, Wm. H. Clement, 43.

Future of Teaching in a Scientific Age, The, Robert R. Buell, 71.

Idaho Biology Teacher Preparation: A Comparison with the Recommendations of the AAAS Cooperative Committee on Teaching Science and Mathematics, Donald C. Orlich and Robert H. Seeling, 357.

Impact of Changing Scientific Knowledge on Science Education in the United States Since 1850, The, Bette J. Del Giorno, 191.

Laboratory Approach to Physical Science, A Case for the, Robert C. Bird, 373.

Learning to Generalize, James M. Ward, 423.

Measurement in Junior High Mathematics, Donald D. Paige and Margaret Jenning, 319.

Measurement of "Understanding Science and Scientists" in Selected Collegiate Academic Groups, Kenneth F. Jerkins, 225.

Measurement of "Understanding Science and Scientists" in Selected Junior High School Classes, Kenneth F. Jerkins, 399.

Measurements in the "New" Science Curriculum, An Approach to, Richard B. Smith, 411.

Observation and Comparison Skill Training on Classification Performance in Junior High Science, The Effects of, Harold R. Hungerford, 53.

Oceanography Course and "Sea Camp" for Teachers and Beginners, A General, Roger H. and Patricia S. Charlier, 105.

On Introducing the Natural e: A Simple Demonstration, Kent E. Chernetski, 133.

Original Machine and Your Secondary School Physical Science Program, The, Donald A. Vannan, 131.

Physical Science: Bedrock of the Earth Sciences, Clifford Bennett, Jr., 125.

Physical Science Museums, Catharine Bergen, 197.

Physics Curriculum Patterns in High School, J. S. Bila and Harold F. Bligh, 241.

Pilot Project in Elementary Science Education, A, Edward Frankel, 343.

Portable Television Tape Recorder in Science Education, The Use of the, Robert B. Sund, 417.

Pottsville (Pa.) Scientific Association, 1854–1862, History of the, Ralph W. Dexter, 29.

Principles of Learning Compatible with a Field-Theoretical Position, Russell N. Cassel, 25.

Program Providing Highly Individualized Instruction for Slow Learning Math and Science Students, A, John Marcek, 217.

Qualifications of Mississippi Public High School Teachers of Physics, Chemistry, and Physical Science Survey, A. Henry Swann, 135.

Quick Color-Lift Transparencies for Earth Science Teaching, Thomas R. Lewis, 45.
Reading and the New Science, Harleen W. McAda and Carolyn Neal Hedley, 151.
Recent Research on Attitudes Concerning Science, Lewis R. Aiken, Jr. and Dorothy R. Aiken, 295.
Relationship between Science Achievement and Selected Student Characteristics, The, Jennings O. Johnson, 307.
Science and Ethics: A Radical Approach to High School Science, Alan Stoker and Peter Thompson, 203.
Science Education for the Elementary School Teacher, Isidore Hudes, 425.
Science Education in Lebanon, Leslie V. Morris, 221.
Science Education in the High Schools of Sierra Leone, West Africa, Ebun S. Sawyerr, 21.
Science Methods Course, An Approach to a, Marvin Druger, 381.
Science Teaching Methods Course, An Analysis of a, William H. Leonard, Jr., 369.
Science Teaching Methods on the Understanding of Science, The Effect of, Roger G. Olstad, 9.
Scientific Smorgasbord from the Bible, A, Pearl Astrid Nelson, 183.
Simplified Guide to Covariance Analysis Using Two Concomitant Variables Illustrated on Data from an Experiment in Education, A, Bernard Pasternack and George Charen, 79.
Six Years of Summer Science Institutes in India: A Program That Has Succeeded, N. Eldred Bingham, 267.
Social Leadership by Science, Harold H. Punke, 321.
Social Science Research, Let's Encourage, Allen Singleton, 409.
Socioeconomically Divergent Superior Students in an Aerospace Enrichment Program, A Study of, Cornelius J. Troost, 325.
Spirit of Science, The, Thomas M. Weiss, 365.
Star Light, Star Bright, Joel Martin, 141.
Status of Elementary School Science Teaching in Lebanon, The, George I. Za'rour, 259.
Student Rating of Science Skills, Frank Lodge, 421.
Student Teachers in Science: What Do They Actually Do?, William N. Pafford, 211.
Teacher Achievement and Student Learning, Herbert J. Walberg and Arthur I. Rothman, 253.
Teacher Attitude Change, A Study in, David P. Butts and Chester E. Raun, 101.
Teacher Change, A Study of, David P. Butts and Chester E. Raun, 3.
Teacher Looks at the Administrator's Role in the Process of Change, A, William E. Hug, 235.
Team Effort to Develop a Curriculum for a School Nature Site, A, John E. Jacobus, 427.
Teamwork in Biology, William E. Hug, 385.
Test to Measure Observation and Comparison Skills in Science, A, Harold R. Hungerford and David T. Mills, 61.
Unified Science: A Workable Approach, Roger W. Ward, G. William Reynolds and Robert Nurnberger, 137.
Use of Science: A Process Approach with Pre-School Age Children, Evaluation of the, Jerry B. Ayers, 329.
Using Educational Television As an Effective Tool in Science Supervision, Paul W. Welliver, 95.
Verbal Inquiry in Junior High School Science, The Assessment of, George Ivany, 278.
What Are the Guideposts for an Effective College Physics Laboratory?, Bruce Dixon, 33.
What the People of Other Nations Really Think of Us, I. D. Wilson, 121.
Whither the Elementary School Science Program?, Harry E. McAnarney, 237.
Workshop and Use of Specially Developed Science Materials on Fifth Grade Science Classroom Practices, A Study of the Effects of a, John L. Wasik and Robert B. Nicodemus, 347.
